

VIBE96 QUALITY REPORT

EasyTaskAI

AI-powered social media manager for creators, agencies and small businesses

Product ID	**B0308-98564**
Builder	**Jehan Ahmed**
Version reviewed	**1.0.0 · released 27 Oct 2026**
Stack	**Express 5.3 · Node.js 20+ · PostgreSQL 15+ (Supabase)**
Built with	**Lovable**
Review period	**23 Oct 2026 – 27 Oct 2026**

92 / 100

Passed with 2 warnings

Pass mark 75 and no failing check.

Scores

Security	95
Code structure	72
Docs & completeness	100
Dependency health	95
Build & deploy	92

✓ **AI code audit**
6 checks · 23 Oct 2026

✓ **Installed & run**
27 Oct 2026

✓ **Demo vs delivered**
27 Oct 2026

✓ **Final sign-off**
27 Oct 2026

At a glance

- ✓ Installed and run from the delivered code — 8 of 8 checks answered yes.
- ✓ Live demo compared with the delivered code — 7 of 7 checks answered yes.
- ✓ 15 of 15 promised items delivered (setup guide, example config and the rest).
- ✓ Security scored 95/100 with no failing check.
- ! 2 open warnings — explained in part 1.

Check this report is genuine. Scan the code or open vibe96.com/report/QR-26-00067. The online copy always shows the latest status.

PART 1

AI code audit

The full source archive was read by our AI auditor against each check. It reads the code — it does not run it; running it is part 2.

CHECK	WHAT WE FOUND	SCORE	RESULT
Secrets & credentials	All API keys, tokens, and credentials are properly externalized to environment variables via .env (which is gitignored). The codebase contains only placeholder references and example documentation. Secret scanning regex hits are all legitimate code patterns (e.g., 'access_token' field names in OAuth flows, 'apikey' headers reading from config).	100	Pass
Dependency vulnerabilities	package.json declares 8 production dependencies with semantic versioning ranges (^). package-lock.json is present and pins exact versions. No known critical vulnerabilities found in the declared versions. All packages are actively maintained. Minor: some dependencies could be updated to latest (e.g., @supabase/supabase-js 2.118.0 → 2.47+, express 5.3.0 is pre-release), but none pose security risk.	95	Pass
Authorisation & access control	All mutating and admin endpoints require authentication and proper role checks. Workspace isolation is enforced via owner-scoped queries. Minor gaps: /api/posts/:id and /api/library/:id lack explicit ownership checks before returning data, relying solely on RLS. /api/demo-login has no rate limiting beyond the global 120/min API limiter.	92	Warning
Database access rules	All queries use parameterized statements or the Supabase client's safe methods—no SQL injection paths found. Delete and update operations are properly scoped to workspace/user ownership. Row Level Security policies are defined in migrations as defense-in-depth. The schema is complete and can be created from empty (migration-all.sql). Minor issue: several foreign key columns lack indexes, which will cause performance degradation as data grows.	92	Pass
Code structure & duplication	server.js is 123 KB with mixed concerns (auth, API routes, business logic). Platform adapters show copy-paste patterns for OAuth token exchange. Frontend views contain duplicated API call patterns and error handling. No dead code detected, but refactoring would improve maintainability.	72	Warning
Build reproducibility	All dependencies resolve, no conflicting versions, and the setup documents provide clear steps. Minor issues: SETUP-WINDOWS.md and HowToSetup.md are redundant; the main README references SETUP-WINDOWS.md but buyers may miss the more detailed a project file; migration execution order could be clearer for first-time operators.	92	Pass

Open warnings

Problems that did not stop the listing. They stay on the product page until a later version fixes them.

Warning 1 **Strong auth on mutating endpoints; minor ownership gaps on read-only routes**

All mutating and admin endpoints require authentication and proper role checks. Workspace isolation is enforced via owner-scoped queries. Minor gaps: /api/posts/:id and /api/library/:id lack explicit ownership checks before returning data, relying solely on RLS. /api/demo-login has no rate limiting beyond the global 120/min API limiter.

Warning 2 **Moderate code duplication and oversized files; some business logic in views**

server.js is 123 KB with mixed concerns (auth, API routes, business logic). Platform adapters show copy-paste patterns for OAuth token exchange. Frontend views contain duplicated API call patterns and error handling. No dead code detected, but refactoring would improve maintainability.

Requirement list

What the builder agreed to deliver before uploading — 15 of 15 met.

✓	Complete source for every component	Met
✓	No real credentials in the archive	Met
✓	Builds from a clean machine	Met
✓	Database script or migrations	Met
✓	Authentication and roles on every mutating endpoint	Met
✓	Pinned dependencies without critical CVEs (nice)	Met
✓	Documentation set (nice)	Met
✓	Working live demo	Met
✓	README.md	Met
✓	HowToSetup.md	Met
✓	CLAUDE.md (or AGENTS.md) (nice)	Met
✓	CHANGELOG.md (nice)	Met
✓	.env.example	Met
✓	a project file	Met
✓	a project file (nice)	Met

PART 2

Human review

Reviewers from the Vibe96 team in Dubai worked through each question below; a final reviewer signed it off.

Stage 1 — Installed and run from the delivered code

Completed 27 Oct 2026

A reviewer installed the product on a clean machine, following only the guide that ships with it.

QUESTION	ANSWER	REVIEWER'S NOTE
Packages restored without errors	Yes	
Solution builds clean	Yes	
Database created from the shipped script or migrations	Yes	
First sign-in works with the documented steps	Yes	
Setup guide is accurate and complete	Yes	
Every module in the feature list opens and works	Yes	
No real secrets in the archive	Yes	
Branding and company details can be changed without code	Yes	

Stage 2 — Live demo compared with the delivered code

Completed 27 Oct 2026

A second reviewer checked that what the listing and demo show is what the buyer receives.

QUESTION	ANSWER	REVIEWER'S NOTE
Demo URL is reachable	Yes	
Demo credentials work	Yes	
Demo runs the same version as the archive	Yes	
All five differentiators are visible in the demo	Yes	
Screenshots match the demo	Yes	
Nothing in the demo is missing from the code	Yes	
Datasheet claims are accurate	Yes	

Changes asked for during review

None — approved on the first round.

Sign-off: approved for sale on 27 Oct 2026 with 2 warnings shown publicly.

What this report covers — and what it doesn't

- **It covers** version 1.0.0 exactly as the buyer downloads it: the source archive, the setup guide and the live demo on the dates above.

- **It is not** a penetration test, a performance or load test, or a legal review of third-party package licences.
- **Scores are a point in time.** Libraries age; a later version is audited again and gets its own report.
- **Your setup matters.** Hosting, configuration and changes made after purchase are outside this review.
- **How the score is made:** each AI check is scored 0–100 and weighted (security counts most). A listing needs 75 or more, no failing check, and the human review passed.
- **Always try the live demo** before buying, and ask the builder questions from the product page.
